RELEASE**

WHAT IS XPOS?

Exclusive to the Commonwealth Bank, XPOS revolutionises EFTPOS by allowing businesses to generate additional sales revenue from their EFTPOS terminal. You can now sell more than 150 products and services, delivered via the EFTPOS printer in the form of a printed voucher. These include pre-paid mobile recharge, calling cards, tolling passes, attraction tickets and other products.

XPOS also allows you to process electronic gift cards and accept bill payments via BPOINT (soon to be released).

ELECTRONIC PRODUCTS

XPOS turns your EFTPOS terminal into a virtual store, printing products from the EFTPOS printer. Sale of these products provides a revenue stream, without stock concerns such as up-front costs and loss of shelf space.

BPOINT BILL PAYMENTS

BPOINT is the Commonwealth Bank's soon to be released over-the-counter bill payment facility, available through XPOS. It enables you to earn additional revenue by collecting bill payments from your customers on behalf of national, state and local billers.

BENEFITS TO RETAILER

- Increase your product range
- Increase customer satisfaction
- New revenue stream
- Increase foot traffic

HOW IT WORKS

1. Customer requests a product
2. Checkout operator selects the item from the POS touch screen menu
3. Operator accepts payment in the form of any media - card, cheque or cash
4. When the payment is confirmed, the system simply prints the voucher.
5. Vouchers are redeemed by visit to entertainment venue, or by telephone contact quoting voucher number.
6. Customer is delighted at enhanced services offered in-store.

GIFT VOUCHERS

XPOS enables you to run a more efficient gift voucher system. It allows you to automate traditional "paper-based" gift-voucher systems by placing a manual gift voucher program onto an electronic mag-stripe card.
